## 7150#write memory

Save the set up

## 7150(config-if-et1)# switchport tap default group EXTRAHOP-IN-1-2

Create a group named “EXTRAHOP-IN-1-2” for some specific interface, here the port 1 defined as a TAP port

## 7150(config-if-et20)# switchport tool group set EXTRAHOP-IN-1-2

Put the Port 20, defined as a TOOL port previously, to collect the traffic coming from the group called “EXTRAHOP-IN-1-2”

## 7150(config-if-et21)# switchport tool group add EXTRAHOP-IN-1-2

Put an additional Port, here is the 21 defined previously as a TOOL port, to collect the traffic coming from the group called “EXTRAHOP-IN-1-2” as well the port 21. If you wrote “set” in place to “add” you ‘ll remove the port 21 for traffic collection.

## 7150#show tap aggregation group

Provide the Group name/TOOL members/TAP members matrix.

Group Name	Tool Members	Tap Members
test	15,16	1
test2	16,21	2,5

**7150#show ip int brief**

Send back the IP address from the management port

Interface	IP Address	Status	Protocol	MTU
Management1	192.168.1.40/24	up	up	1500

**7150 (config-if-Et20)#switch tool group remove EXTRAHOP**

Remove a port from a group TOOL, here it's the group named EXTRAHOP

**7150 (config)#default interface ethernet 19**

To cancel the TAP or TOOL mode from an interface

**7150#show interfaces transceiver**

Screen the power optical status of interfaces
