

Jumper, a nice Aggregator

The Jumper is specifically designed to transmit traffic from up to 8 ports (4 in-line links or 4 SPAN) into a single NPB port as opposed to the traditionally required 8. By optimizing the number of ports utilized on your Network Packet Broker, the Jumper allows for unprecedented savings and outstanding return on investment.

Designed for cost effective connection and efficient monitoring your network:

Jumper RJ45-10G

This JUMPER is a straight forward solution. It is a perfect connectivity product for various appliances like :

IDS (security) tools
Packet Flow Switches
Consolidating Tools
Network Monitoring
Protocol Analysis

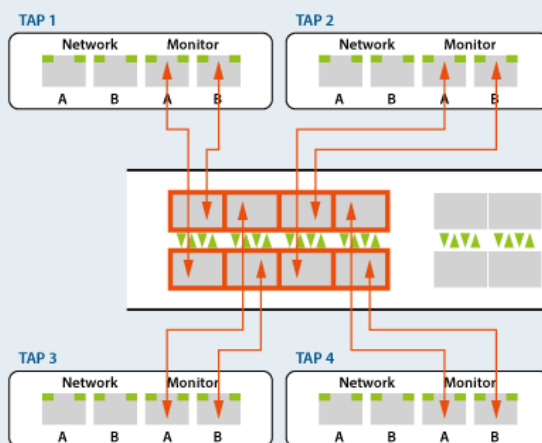

In-Line it passively sees and monitors all protocol layers, offering .

- Aggregation of 8 RJ45 10/100/1G links into 1 SFP+ 1G-10G output
- Direct link aggregation, no management, installation or driver required
- No bottlenecking; full line-rate performance with reduced delay and no dropped packets
- Non-intrusive to the network
- Redundant powering
- In case of complete power failure, the Jumper keeps the link up and switches to a fully passive mode, guaranteeing a fully operational network

Conventional

4 in Line ports use 8 ports

Jumper

4 In Line or 4 Span ports in 1 port

Connectors	8 x RJ45 8 pins • 1 x SFP+ • 2 x 12 VDC
LEDs	18 x Speed and Link Activity • 2 x Power
Dimensions (mm)	Width 120 • Depth 190 • Height 41
Dimensions (in)	Width 4.72 • Depth 7.48 • Height 1.61
Weight (g)	778
Weight (lb)	1.72
Accessories	2 x 90-240 V Triple Output PSU
Compliance	RoHS • CE • FCC class A
